Mississippi State and School and Employees' Health Insurance Plan NetResults™ Prescription Drug Guide

October 2020

The formulary is a list of medications covered by the Mississippi State and School Employees' Health Insurance Plan. The formulary consists of both brand and generic drugs. Covered drugs are chosen based on their clinical appropriateness and cost effectiveness. The formulary is regularly updated. Please check the website for the most up to date listing, as the list is subject to change.

Please consider talking to your medical provider about prescribing covered medications where non-covered (NC) medications are listed. Selecting preferred generics (p) and preferred brand medications (P) will help reduce your out-of-pocket costs compared to non-preferred medications. This list may help guide you and your doctor in selecting an appropriate medication for you.

Introduction

The Mississippi State and School and Employees' Health Insurance Plan NetResults™ Prescription Drug Guide contains covered drugs for a broad range of diseases.

Generic drugs are shown in lower-case **boldface** type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand.

Brand prescription drugs are shown in uppercase letters followed by the generic name.

The Prescription Drug Guide is organized into broad categories (e.g. Anti-infective drugs). Within most categories, drugs are sub-grouped by drug class (e.g. Penicillins) or by use for a specific medical condition (e.g. Diabetes).

To save the most money on prescription drugs, take this drug list with you each time you visit your medical provider. Consider asking your medical provider to prescribe preferred generic and brand formulary medications, if appropriate. Remember, treatment decisions are between you and your provider.

Formulary Status	Copayment per 30 Day Supply

Coverage Considerations

Your drug benefit plan provides coverage for up to a 30-day supply of medication, with some exceptions. Your plan also provides coverage for up to a 90-day supply of maintenance medications. Maintenance medications are those drugs you may take on an ongoing basis for conditions such as high blood pressure, diabetes, or high cholesterol. Certain medications are excluded from coverage.

Home Delivery Service: Participants can enjoy the convenience of receiving a 90-day supply of their medication(s) by mail by using Prime's home delivery program, AllianceRx Walgreens Prime. You can register online at www.MyPrime.com or call 855-457-0408. For additional details, please see your Plan Document.

Over-the-counter exclusions: The Plan generally does not provide coverage for prescription medications that have an over-the-counter version.

Pseudoephedrine Medications: Coverage is provided for over-the-counter medications containing pseudoephedrine only when a prescription is required.

Compounded medications: Your benefit plan generally does not provide coverage for compounded medications containing bulk chemicals. Compound medications exceeding $200 will require approval by Prime. Please see your Plan materials or call the number on the back of your ID card to determine whether compounded medications are covered and/or verify your payment amount.

Repackaged medications: Repackaged versions of medications already available on the market are not covered.

Diabetes Related Medications: Preferred (P) insulins, testing supplies, insulin needles/syringes, and glucagon will have a $12 copay at retail pharmacies per 30 day supply.

Prior Authorization (PA)

Some drugs require prior authorization (PA) to ensure appropriate use. This means that the prescribing provider will need to submit a PA request for coverage. PA request forms may be submitted electronically via CoverMyMeds®, faxed into Prime at 855-212-8110, or the provider may contact Prime at 855-457-0408 for additional information. Coverage may be approved after certain criteria are met. If a PA is required for a drug listed in this document, it will be noted next to the drug with a dot under the PA column.

Step Therapy (ST)

A step therapy (ST) program means you may need to try one or more alternative drugs before coverage may be available for the requested drug. ST programs help redirect members to safe, effective and less expensive alternatives. If a ST is required for a drug listed in this document, it will be noted next to the drug with a dot under the ST column.

Quantity Limits (QL)

A quantity limit (QL) is the maximum quantity that can be dispensed over a given period. These limits help encourage safe and proper use based on FDA guidelines. Your provider must submit a prior authorization request to Prime for approval of amounts that exceed the established quantity limit. If a QL is required for a drug listed in this document, it will be noted next to the drug with a dot under the QL column.

Specialty Drugs (S)

Specialty drugs (S) require special handling, patient monitoring, and unique education prior to use. Specialty drugs are typically high cost, self-administered drugs that require considerable support to manage and administer. These drugs often treat rare, chronic conditions and may require unique delivery or dispensing considerations. Additional patient support, safety monitoring, compliance and patient training may be required to manage these conditions.

Specialty drugs are limited to a 30-day supply, and must be purchased through AllianceRx Walgreens Prime, or any other approved specialty pharmacy within the specialty network, to be covered. Participants can call Prime at 877-627-6337 for more information.

Non-covered Drugs (NC)

Certain drugs are listed as non-covered (NC) on the formulary. We encourage you talk to your medical provider about prescribing a preferred alternative. This is because there are clinically effective, lower cost therapeutic options available on the formulary. In the case of medical necessity, these products may be eligible for a Coverage Exception Policy (CEP) review. If the CEP criteria are met, the claim will process at the non-preferred copay.

Drug Exclusions (*)

An asterisk (*) indicates a plan benefit exclusion. This means the medication is excluded from coverage under the Plan. These products are not eligible for a Coverage Exception Policy Review. These include but are not limited to drugs used for infertility, compounds containing bulk chemicals, cosmetic agents, non-FDA approved medications, etc. Please refer to the Plan Document for a complete list of benefit exclusions.

Notice

The purpose of the NetResults™ Prescription Drug Guide is to assist you in maximizing your prescription drug benefits under the Plan. Although the Plan provides cost effective alternatives to most medications, decisions about the need for a prescription drug and dosage of a prescription drug are between you and your medical provider.
